ON CAMPUS: To connect to Digital Worlds' Guest Server on campus while connected to the UF WiFi or wired network, skip the steps below related to connecting off campus via VPN.

_____

OFF CAMPUS: To connect to Digital Worlds servers from off-campus, outside the UF network, follow the UF IT instructions at the link below to download and configure the Cisco AnyConnect VPN.

https://connect.ufl.edu/it/wiki/Pages/glvpn-anyconnect-install.aspx

You will need to use your Gatorlink credentials when logging into UF VPN.

_____

Once connected to the UF network on campus or off campus using the Gatorlink VPN, connect to the Digital Worlds Guest Server.

PC
- To map a network drive, open a File Explorer window, right click This PC, select Map Network Drive. Select any available drive letter.
    - DW-ORANGE Server, DW-Guest volume
        - type in \\dw-orange.dwi.ufl.edu\DW-Guest + Finish
    - Enter your UF gatorlink username, preceded by UFAD\
        - i.e. UFAD\username
        - followed by Gatorlink password

Mac
- DW-ORANGE Server, DW-Guest volume
    - In a Finder window, type Command+K
        - type in smb://dw-orange.dwi.ufl.edu/DW-Guest + Connect
    - Enter your normal UF gatorlink credentials to connect
    - If connection does not work, try including "UFAD\" before your user name
        - i.e. UFAD\username
